FIOR & GENTZ

Checking the Orthosis' Alignment on the Patient – Statically

1. Question:
Is it possible to stand upright and free-handed without further medical devices?

2. Question:
Is it possible to shift the centre of gravity forward?

If this question is answered with No, additional adjustments are required. These adjustments should always be made on the workbench, not with the orthosis in use!

You can find further information in the online tutorials.
