

PARKSTREET

Orthosis Shoe. Different.

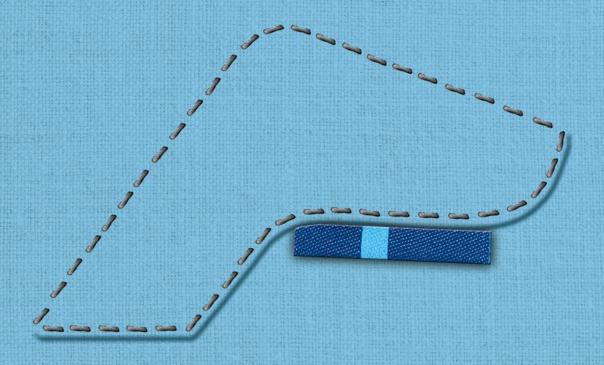

PARKSTR巨匠T Style and Function for Everyday Life.

The PARKSTREET orthosis shoe is not just new, but also different. It is the result of years of experience, which we gained during the construction of custom-made orthoses. The requirements and demands for an orthosis shoe of people wearing orthoses were the main focus.

A unisex shoe that not only differs from conventional orthosis shoes in its extraordinary design features, but also in its modern style. Casual through everyday life with PARKSTREET – the original with the boomerang.

What Is Different?

The integrated elastic textile material offers comfortable space for orthoses with ankle joint and at the same time prevents the deformation of the shoe's upper.

Stability

The higher, anatomically formed upper and the integrated heel cap guarantee high stability.

PARKSTREET. Handmade with compelling details.

and taking off the shoe.

Each pair of shoes comes with a Guide for One-Handed Lacing as well as an additional lace for one-handed lacing, which offers support for patients with hemiplegia.

Guide for One-Handed Lacing

Individual Shortening and Wide Opening

Thanks to the elastic textile material and the combination of adjustable hook and loop fastener and laces, the shoe opening can be enlarged so that the shoe is comfortable to put on.

The two insoles (5mm each) are removable and serve as volume compensation. The heelless rubber outsole insulates from coldness and wetness and has a slip-resistant, shock-absorbing tread.
